DETAILED ACTION

Receipt is acknowledged of the amendment filed 09/22/03.

Election/Restrictions

Applicant's election without traverse of Group I in Paper No. 09/22/03 is acknowledged.

Claims 11-20, 25, 27, 29 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 09/22/03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 21-24, 26, 28 and 30 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lerner et al.

Lerner et al disclose a method of delivery a biologically active agent to the CNS bypassing the blood brain barrier utilizing an energy source such as an electrical field (see page 31, line 33). One or two electrodes are placed either in the nasal cavity

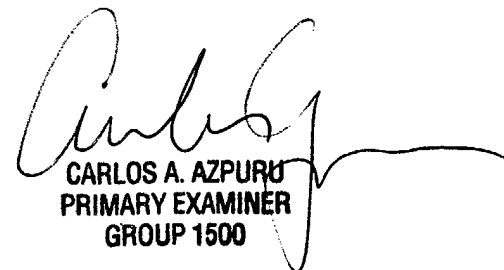

or temporal region of the head (see page 33, lines 26-33). Other energy sources for the iontophoretic method are disclosed at page 34, lines 19-25, and include magnetic energy. Intracerebral delivery is found at page 35, lines 34 et seq, and page 367, lines 34 et seq. This can either be done transnasally or transocularly. The instant method of iontophoretic drug delivery to the Central Nervous system is therefore clearly anticipated by Lerner et al.
